Take Time To Get A Flu Vaccine

- Flu vaccines help to reduce the burden of illnesses, hospitalizations and fatalities each year.
- It is especially important for people at high-risk to get regular vaccinations to decrease their risk of developing severe illness or flu.
- People at higher risk of serious flu complications include young children, those who are pregnant, people with chronic health conditions like asthma, diabetes or heart and lung disease, and people 65 years and older.
- Vaccination also is important for health care workers, and other people who live with or care for people at higher risk to keep from spreading flu to them. *Source: cdc.gov*

Translation Services Bridge Language Gap

We've partnered with Boostlingo to bring even more services to our residents and families. The Boostlingo platform give us 24/7 access to language interpreters that help us communicate with anyone regardless of language. Hundreds of languages including American sign language are quickly and easily interpreted by professional, certified multilingual interpreters who have health care terminology experienced. Boostlingo is HIPAA and JCAHO compliant, and interpreters are required to be both medically certified and HIPAA compliant.

Success Story: William G.

I came to Holton Manor after a fall off a ladder from about 12 feet in the air. I spent 10 days at Rockford Hospital undergoing surgical repair of my spine. I was transferred to Holton Manor because it was close to my home in Delavan and has a (Medicare) 5-star rating.

I have to say that I could not have made a better choice. The people here are nice and caring, the food is really good, and it is clean and well kept. The therapy department is awesome! Everyone is caring and compassionate. They push you to do better, but always in a positive manner. They really love their jobs and the residents, and always make therapy fun so you don't think of it as work. I have been here a little over a week and have regained the ability to walk and dress myself. My plan is to go home soon and I thank each and every person that works at Holton Manor for getting me back on my feet again.

Visitation Guidelines: Letter From the Administrator:

I hope all of you are healthy and well. With fall in full swing and the kids back in school, we have seen an increase in community spread of COVID. With that increase we have had a whirlwind of changes in the guidances delivered by our governing bodies regarding outbreak, visitation, testing, quarantine, etc. Please keep in mind this is subject to change, so please be sure we have a current email address on file for you as we utilize email to communicate to our residents' family members.

Many of you have inquired as to why we have not mandated the COVID-19 vaccination for our staff. I have provided an explanation below. This is obviously a sensitive subject right now, and in no way is it my intention to politicize this issue. I simply want to provide you with the background and reasoning.

Long term care is one of the most heavily regulated entities in healthcare. When it comes to COVID, we are governed by the CDC, CMS (Centers for Medicare and Medicaid Services), Wisconsin Department of Public Health, and Walworth County Public Health. President Biden made an announcement on August 18th that his administration is

mandating all staff of nursing homes be vaccinated for COVID-19. His plan is to enforce this through CMS's rules of participation. Nursing homes follow CMS rules of participation in order to be provided payment of Medicare and Medicaid funds which allows us to give care to so many seniors. Unfortunately, we have not received the guidance from CMS on mandating the vaccine. It is coming, and we expect that we will be mandating the vaccine at that time. With that being said, we have seen both vaccinated and unvaccinated staff test positive for COVID. The vaccine is not meant to stop the spread of COVID; it's meant to minimize symptoms of COVID and to reduce hospitalizations and deaths. We have definitely seen the effectiveness of this in our vaccinated staff. The vaccine absolutely has its benefits. For over a year and a half, I've asked everyone to please be patient with us as we navigate through this pandemic. I appreciate all of your patience and ask that you continue to have patience in this matter as well.

Regards,

Jess Kuhart, BSN, RN, LNHA
